

# All Hands on Deck! You Can be a Percussionist, Too!

Clap Along!

Cin-na-mon Su-gar In The Roll

## Remember?

Try and find all the percussion terms in the word search! Here are your clues:

1. A group of three musicians
2. A pattern of sounds
3. An instrument that is round with metal jingles on it
4. An instrument that is a box with guitar strings in it that you can sit on while you play
5. A mallet percussion instrument that is 4 to 5 octaves long and made out of rosewood
6. Fancy mallets (!!) you can use to play a PVC pipe marimba

## This or That?

Do you think you know your physics of sound? Let's find out! Circle all the instruments you think make a LOWER sound!

## Make!

Here are step by step directions on how to creatively make a shaker at home:

**Step 1:** Find an object that can be the outside of your shaker. This can be a tupperware, an emptied spice bottle, a recycled bottle with a cap, etc.

**Step 2:** Find some material to put inside that can be shaken around. This can be dry rice or beans, tic tacs, small rocks, etc. Don't fill it too much. You need space to shake!

**Step 3:** Seal the outside of your shaker if needed: If you are using an object that needs tape to stay together, do that now! If you're using something like tupperware or a bottle with a cap, simply put the top onto your object.

**Step 4:** Shake! Play along to some of your favorite songs with your newly made shaker! This is what our homemade shaker looks like:
